

Why Is Entrepreneur Skills Curriculum Not Taught in Our Schools?

Saturday, 29 September 2007

The Consortium for Entrepreneur Education and CEO Space have entered into an alliance relationship to bring Entrepreneur Curriculum to public schools. CEO SPACE draws upon the largest body of entrepreneur curriculum study material. The CEE press release on the recent alliance appears in the press section of this web site (see CEO SPACE in the press - pull down menu). Traditional education has limited experience with practical versus theory related to entrepreneur education. CEO SPACE offers training to help educators revise their curriculum through the Free Enterprise Forum. Ask for special educator membership packages for this purpose.
